

FABORG PRESENTS

ARKA

BIO NUTRIENT &
INSECT REPELLANT

Product Overview

ARKA

Multi-purpose Fertilizer

WHAT IS ARKA?

NATURAL AYURVEDIC PEST REPELLANT

ARKA is a mixture of 5 different plants used in Ayurveda that repels pests and boosts the growth and immunity of the plants.

MAIN BENEFITS OF ARKA

**REPEALS VARIOUS
PESTS AND INSECTS**

**INCREASES IMMUNITY
OF THE PLANTS TO
DISEASES**

**INCREASES YIELD AND
DROUGHT RESISTANCE
OF THE PLANTS**

IMPROVES SOIL QUALITY

WHY ARKA?

ARKA is a plant extract which is not only a bio insect repellent but also an organic fertilizer. Like common fertilizers, ARKA is rich in macro nutrients which are easily absorbed by plants.

WHY ARKA?

Apart from providing macro nutrients, it also contains several micronutrients and trace elements such as calcium, sulphur, iron and magnesium among others.

WHY ARKA?

Presence of alkaloids helps in the management of pests (mosquitoes, ticks, termites, ants), nematodes and crop diseases.

WHY ARKA?

Since Arka is completely organic, produced without the use of chemicals, it greatly improves the soil structure and stimulates the growth of beneficial organisms in the soil.

APPLICATIONS

INDOOR

Disinfect and repel insects with 100% plant based solution

GARDEN AND OUTDOOR

Repel pests and improve vitality of the garden

RESTAURANT AND RESORT

Give your customers a mosquito free experience

FRUITS AND VEGETABLES

Increase the yield, repel pests and prevent diseases

INSTRUCTIONS TO USE

INDOOR: Add **30ml** of ARKA with general cleaning liquid to **5 litres of water**. Wipe grills, wooden furniture, doors, windows and tiles **ONCE A WEEK**. Use for floor wash on **DAILY** basis. Keep good air circulation until washed surfaces are dry. Dispose used water into drain or WC to prevent breeding in the drainage system.

GARDEN & OUTDOOR: Dilute ARKA in **1:15 ratio with water**. Spray mixture thoroughly on all surfaces outside your home, like walls, cement areas, plants and grass. If possible, spray 10 feet outside of compound too. The mixture has a natural odor, which disappears in 30 min. So perform the treatment **ONCE A WEEK** at a convenient time.

In infested areas, repeat the treatment more often or increase the concentration of spray liquid til desired results are achieved!

Lasting results will be evident with continued usage.

DILUTE WITH WATER

Seed treatment:	10 ml / litre
Drip/ sprinkle* system:	1 litre / Acre
Potted plants:	66 ml / litre
Foliar spray:	500-1000 ml / acre
Spray gun:	66 ml / litre
Soil drenching:	1 to 2 litres / acre

*Dilute ARKA with water before introducing into the irrigation system

The odor of the extract stays for 30 minutes. -so apply extract at appropriate timings.

SHIVAJI

Auroville Farmer

Best natural solution for boosting the growth and the yield of my crops. The difference from previous year can be seen with the naked eye.

JAY ADAMS

**Executive Chef @
Coromandel cafe**

Very happy to have an effective organic mosquito repellent solution at work and at home. 100% worth investment!

SIVA

Organic Cotton Farmer

Comparing to chemical cotton farmers next to my field, I had much healthier plants that gave 10% more yield.
